Subject: Groundwater Monitoring Report Forms
Exxon Chemical Americas, Baton Rouge Plastics Plant
LAD 00-077-8381

Dear Mr. Howard:

Acting on behalf of Exxon Chemical, Baton Rouge Plastics Plant, we are submitting herewith the Louisiana Groundwater Monitoring Report Forms for all existing monitoring wells at the subject facility.

The statistical evaluations required under Section 12.1.8(H) of the HWMP have not been completed for the enclosed data and will be supplied to your agency under separate transmittal upon completion. We are awaiting various DNR determinations on application of statistical procedures for use in the subject Exxon data before finalizing the statistical evaluations.

For your use in locating the monitoring wells, we are enclosing a vicinity map of the facilities.

We trust that the enclosed data forms are sufficient to meet the requirements of your agency in regard to groundwater monitoring. Should you have any questions or desire additional information please contact us.

Very truly yours,
C-K Associates, Inc.
